¹ Only biomass defined as the biodegradable fraction of products, waste and residues from biological origin from agriculture (including vegetal and animal substances), forestry and related industries including fisheries, and aquaculture, as well as the biodegradable fraction of industrial and municipal waste.

² Please be aware, that animal fat is not considered biomass in some Member States. Biofuel produced from a feedstock of animal origin might thus not be eligible to be counted against the biofuel quote in those Member States.

³ Vegetable oil which has been used for cooking or frying meat and therefore may be contaminated with animal content does not classify as of animal origin
