

Better for
YOUR BUSINESS
Better for
OUR ENVIRONMENT

MOPAC is one of the largest renderers in the Northeast and understands the challenges restaurants face when recycling grease. Not only do you have to remove the grease, but you also want to ensure it is disposed of properly—in a safe **environmentally sound manner. That's where we can help. We'll ensure you're doing all you** can to protect the environment and the community you serve.

OUR COMMITMENT

Each member of our customer service team is dedicated to ensuring you receive the service and knowledge MOPAC has come to be known for. We remove your grease in a timely, secure manner and recycle it into contaminant-free feed for animals, industrial uses, and bio-fuels.

140 YEARS OF SERVICE

Safe, Efficient Grease Recycling

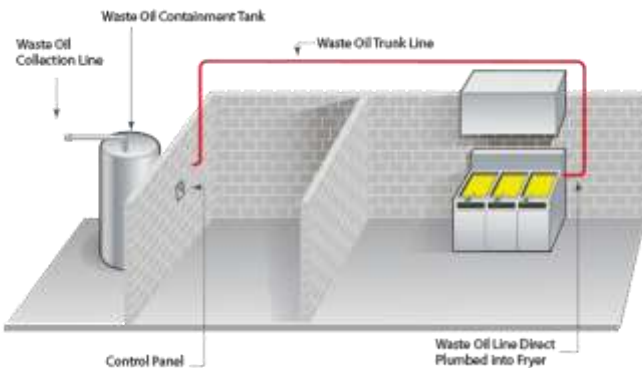

RESTAURANT & CHAINS Outdoor Solutions

MOPAC can provide different outdoor containers, which are always complimentary with our service. Our outdoor containers are all made with durable materials, as well as protective features like locks and screens. MOPAC supplies 2-55 gallon drums, or a 110, 200 or 300 gallon tank.

Indoor Solutions

Additionally, we offer a customizable indoor tank, where the specs can be determined by our customers. We can evaluate your property for the best location to install an indoor tank, keeping in mind that our customers want their tank in a discreet location while also giving access to our drivers. Restaurant owners with multiple locations can work with our team for any combination of these solutions for each store.

SUPERMARKETS

Combine Byproduct Recycling

Supermarkets and other similarly structured stores and businesses depend on MOPAC for collection of not just their used cooking oil, but other materials as well. We collect inedible fat and bone product. All of these materials are processed at our main facility and recycled into different markets. MOPAC takes unwanted, used material from supermarkets and give it a second life. MOPAC has multiple sized storage containers for cooking oil or inedible products, all fitted with lids.

INDUSTRIAL PROCESSORS, CASINOS, STADIUMS & MORE

Customized Solutions

For large venues, disposal services need to be prompt, hassle-free, and consistent. Each location or venue is unique, and MOPAC understands the challenges this poses. We currently partner with various industrial processors, like snack food companies, as well as hotels, casinos, stadiums, and concert halls. MOPAC sources indoor tanks to spec, as well as offering mobile grease disposal units that can clean a fryer in 30 seconds and holds up to 75 gallons of used oil, making it one of the safest and most efficient grease collection units on the market.

OUR GUARANTEE

140 Years of Reliable Service

Even better than **knowing you're** dealing with an experienced, secure, and **"green-friendly"** renderer, you have our guarantee that:

- We recycle 100% of what we pick up
- Our employees are trained to HACCP level
- Our operations are governed by FDA regulators
- We are licensed by the PA Department of Agriculture and the PA Department of Environmental Protection

THE MOPAC ADVANTAGE

- We are also fully insured
 - Computerized routing and scheduling for your grease recycling needs
 - Reliable, on-time pick-up
 - On-site evaluation and consultation to best determine your needs
 - State-of-the-art, tailored equipment and containers to store your grease until pick up
 - Service for both outside and inside grease recycling containers
 - Emergency response for spills
 - We provide used cooking oil recycling bulk and barrel system equipment
